I-Cut 11 PortionCutter

The I-Cut 11 PortionCutter is an accurate and reliable portioning machine designed to give immediate results on your bottom line. With only a few touches to the control panel you can move away from inaccurate cutting by hand to accurate portions of boneless meat products – beef, pork and veal – on weight every time.

You can make substantial savings on labour due to the speed and versatility of the I-Cut 11. Improvements in yield will furthermore secure a very fast payback on your investment.

The machine has been designed for easy and thorough cleaning to comply with food safety regulations. The compact design makes it easy to install the I-Cut 11 PortionCutter in almost any small plant layouts.
